We're making essential repairs to your power network

Hello. We're SP Electricity North West and we operate your local electricity network.

Over the next six months, we're carrying out crucial repairs on the power network in Stockport.

The work we are carrying out will see 2.4 kilometres of new underground electricity cables installed following flood damage earlier in the year. The significant repair work will also increase the capacity, resilience and reliability of the electricity network in the area which will benefit residents and businesses and future-proof the network.

We are working closely with the local authorities to minimise disruption.

How this will affect you

- Engineers will start work on **Monday 1 September 2025**, at Broadstone Hall Lane South
 - Traffic management will be in place to allow our engineers to work safely.
 - Access to properties will be maintained throughout all of the project
 - All works taking place have been agreed with the local council
 - Local electricity supplies should not be affected by the works

Throughout the project, we'll do our best to keep disruption to a minimum. Please do get in touch if you have any queries.

Yours sincerely

Anthony Dunphy
Project Manager
