

DG LV workshop

Wednesday 22 January 2020

Feedback summary

Stay connected...

www.enwl.co.uk

Attendance:

- Sixteen stakeholders registered to attend this event, with eight attending on the day. This gives us an attendance rate of 50%. Although our previous event in July 2019 had a higher percentage turnout, this event had more than double the amount of registrations, and the highest attendance rate for our DG LV workshop to date.
- Seven out of the sixteen registered delegates responded to our calendar invites and accepted the invite as confirmation of their attendance.
- Two of the delegates also attended face-to-face surgery appointments with our connections experts in the morning prior to the workshop.
- Three delegates got in touch after the event to advise that they were unable to attend due to high workloads and meetings that took priority.

- 100% of the attendees surveyed rated the event ‘useful’ or ‘very useful’.
- We asked stakeholders out of the topics presented at the workshop they found to be the most useful / interesting. The overall information provided on G98 and G99 and networking proved the most useful.

Topics for next time:

- Do’s and don’ts of G98 and G99
- Energy Storage
- More on EV and how the future looks

“I would like to thank you for the time and effort that was clearly made to put on this successful event”.

“Good location and time”

“Great day, thank you”

DG LV workshop photos and feedback

“I think it’s very good and the knowledge at Electricity north West is very clear to see. I do think it’s very compact and more time is required”.
