Welcome

This simple guide is here to help you use our Network Asset Viewer. To find out more about it please visit our website, <https://www.enwl.co.uk/get-connected/network-information/network-asset-viewer>. If you need to get in touch, please use the contact us link in the Network Asset Viewer.

The Network Asset Viewer is designed primarily for desktop use, so please be aware that all the features may not work on mobile devices. In addition, it is not compatible with the Internet Explorer browser.

View our assets

You can use the map to navigate to a specific location, or search for an asset in the following ways:

1. By substation name or number, e.g. Citadel / 638094
2. Using co-ordinates:
 - a. Easting and northings, e.g. 349398, 434762
 - b. Longitude and latitude, e.g. -2.7031, 53.7632
3. By postcode, e.g. PR1 6LB
4. By SPN (Structured Plant Number), e.g. 4106470ST001
5. By FID (Feature Identifier), e.g. 5632498
6. By pole or tower number, using SPN or FID.

Guidance continued on next page.

Type in your search criteria, and results will drop down below the search box.

Click on the result you're looking for to zoom into it on the map view and display the 'asset information' pop-up.

Trace our assets

Our Network Asset Viewer allows you to add point and line assets from the map to a workspace on the right-hand side of the screen, so you can build a trace of the network within the map view.

Start by selecting a traceable asset on the map view (highlighted in yellow) to open the 'asset information' pop-up.

Click on the 'plus' symbol to add it to your list of assets to trace in the 'workspace'.

You can add more assets to trace in the same way, and your previously selected assets will stay highlighted in magenta on the map view.

The assets that you have selected to trace will appear in the 'workspace' to the right of the map view.

From the 'workspace' you can click on an asset to zoom into it on the map view, or you can delete it by clicking the bin symbol.
