

AIR CONDITIONING TIME OF USE TARIFF

- **Lower electricity prices at off-peak times** on hot days (when there is less air con usage and less demand on the electricity network)
- **Higher electricity prices at peak times** on hot days (when there is more air con usage and more demand on the electricity network):
 - Weekdays: 6-9pm
 - Weekends: 12-3pm and 6-9pm

AIR CONDITIONING PEAK TIME REBATES

- Cost of electricity remains the same at all times
- Rebate (refund) given if you use less air con (e.g. turn it off or turn your thermostat up) during 'peak events'. These events are times when the electricity network is under pressure e.g. because the weather is very hot and everyone is using their air con
- You will be told in advance when 'peak events' are
 - Maximum 2 events per day
 - Events might last between 30 minutes and 2 hours
- Events will happen at times of peak electricity use:
 - Weekdays: 6-9pm
 - Weekends: 12-3pm and 6-9pm
